PROFESSIONAL PROFILE

Data Analyst with experience in operational reporting, business intelligence, data cleaning and applied analytics, supported by MSc-level Data Science study at the University of South Wales. Experienced in analysing large datasets, developing Excel and Power BI dashboards, preparing KPI reports and communicating findings to support evidence-based decision-making. As documented on my github portfolio in one of my projects, I developed an end-to-end breast cancer diagnostic data analysis project using Python, incorporating exploratory data analysis, feature engineering, dimensionality reduction, clustering, classification, hyperparameter tuning and model evaluation.

I am interested in applying my analytical skills to public health intelligence, cancer analysis and population health. My healthcare support experience has provided exposure to healthcare environments, while my analytical projects have strengthened my understanding of data quality, model limitations, responsible interpretation and the importance of confidentiality. I am keen to contribute to reliable, accessible and evidence-based reporting that supports informed decisions and improved population health outcomes.

TECHNICAL SKILLS

- **Data analysis**: Data cleaning and transformation, exploratory data analysis, statistical analysis, feature engineering, model evaluation and data interpretation.
- **Programming and databases**: Python, R, SQL, Bash, MySQL, Oracle SQL Developer
- **Reporting and visualisation**: Microsoft Excel, Power BI, Tableau, Looker Studio, dashboard design, KPI reporting and stakeholder reporting.
- **Advanced analytics:** Spatial clustering, forecasting, classification, regression, clustering, PCA, predictive modelling and cross validation.
- **Data quality and delivery:** Data-quality assessment, identification of data inconsistencies, record accuracy, data validation, technical documentation, requirements analysis and risk assessment.
- **Exposure to Big data and cloud**: Hadoop, HDFS, YARN, MapReduce and AWS services including S3, DynamoDB and EC2.
- **Microsoft Office:** Excel, Word, PowerPoint, Outlook and Microsoft Teams

EDUCATION

- **MSc (Hons) Data Science** @ University of South Wales, United Kingdom | Sep 2025 – Oct 2026
  Status: Academic requirements completed; formal award confirmation pending.
  MSc Dissertation: Developing a Crime Pattern Recognition and Prediction Model for the City of Los Angeles
- **BSc (Hons) Building** | University of Uyo, Nigeria | Sep 2012 - September 2018
  BSc Research Project: Assessment of Procurement Methods Adopted for the Development of Religious Building Projects in Akwa Ibom State

- **West African Senior School Certificate Examination** @ Bright Stars Model Secondary School, Nigeria | Dec 2010
- **First School Leaving Certificate** @ University Staff School, Nigeria | July 2003

LANGUAGE: English (Advanced)

SELECTED DATA SCIENCE & CLOUD PROJECTS

- **MSc Dissertation | Crime Pattern Recognition and Prediction — Los Angeles**
  Analyzed LAPD incident data from 2020–2023, using 875,087 coordinate-valid records for spatial analysis and a monthly division/crime-category forecasting panel. Applied DBSCAN and identified 315 spatial clusters; assessed hotspot recurrence. HistGradientBoosting achieved 14.18% WAPE on the locked 2023 test set versus 16.00% for the seasonal-naive benchmark. High-volume identification achieved 94.62% precision, recall and F1.

- **Breast Cancer Diagnosis | Machine Learning**
  Developed a reproducible workflow with preprocessing, exploratory data analysis, feature engineering, PCA, clustering and five supervised classifiers. The Random Forest model obtained 95.65% held-out test accuracy and the SVM model achieved 97.34% mean cross-validation accuracy.

- **Customer Review Intelligence | NLP & Text Mining**
  Applied text mining, sentiment and emotion analysis, LDA topic modelling and logistic regression analysis on a reproducible sample of an e-commerce dataset containing 23,486 reviews. Identified common fit and sizing themes, and analysed recommendation patterns related to ratings.

- **EcoStream Energy | AWS Cloud Infrastructure & Data Analytics**
  Developed an AWS workflow that included S3 storage of telemetry, DynamoDB import and validation of five business queries, CSV export of results, a custom Node.js AMI and Apache-hosted EC2 web page within a configured VPC.

- **PageTurner Books | Linux, Bash & Hadoop Text Analytics**
  Developed Bash directory structures and Python map reduce workflows using Hadoop, HDFS, YARN, and Hadoop Streaming. Ranked the ten most frequent words in “A Christmas Carol” and produced a sentence-count result of 10,941 for “Moby Dick or The Whale” txt datasets.

- **University Computing Department Database | SQL**
  Developed entity relationship diagram and relational database for courses, modules, tutors and students; created tables, primary and foreign keys, sample records and five SQL queries on associated tables.

WORK EXPERIENCE

Part-time Work Experience during MSc study period | Sep 2025 – to date
Warehouse Assistant @ Rapid Personnel | UK | Sep 2025 – Jan 2026
Healthcare Support Worker @ Avon Healthcare Solutions | UK | Feb 2026 – Apr 2026
Healthcare Support Worker @ Safehands Recruitment | UK | Apr 2026 till date
Healthcare Support Worker @ Pro Nursing | UK | Aug 2026 till date

BI Manager @ Micnous Service Nigeria Ltd, Nigeria | Jan 2022 – Aug 2025

- Gathered, cleaned and analysed project data including schedules, costs, materials, equipment utilisation and labour to support operational and management decisions.
- Created Excel and Power BI dashboards and KPI reports for monitoring project progress, budget variance, resource allocation and delays.
- Collaborated with engineers, project managers and site supervisors to understand their information requirements and communicate analytical results.
- Performed cost-benefit analysis and risk assessments based on historical data to support planning and resource decisions.

Data Analyst @ Micnous Service Nigeria Ltd, Abuja, Nigeria | Jan 2020 – Dec 2021

- Maintained daily site reports, material usage, labour hours and equipment logs.
- Produced weekly progress, expenditure and resource allocation summaries.
- Assisted in identifying data-quality gaps, improving data-entry processes and maintaining accurate, accessible project records.

Lab Technologist (NYSC, part-time) | Omavic Synergy Consults Ltd, Delta, Nigeria | Dec 2018 – Oct 2019

- Conducted soil and construction-material tests, maintained accurate records and supported engineers with interpretation for foundation and subgrade assessments.

Building Engineer (Student IT, part-time) | MME UG Enviroventures Nigeria Ltd, Uyo, Nigeria | Jun 2015 – Jan 2016

- Supported design proposals, building-services supervision, and work-crew coordination while following site safety requirements.

PROFESSIONAL TRAININGS AND VIRTUAL INTERNSHIPS

- **Data Analysis Hands-On Virtual Training | Victoria Solutions, London | Oct 2025**
  Completed a four-week practical program covering SQL and Python data cleaning and transformation, Power BI and Tableau visualization, statistical analysis, and predictive modeling. Completed case studies and projects involving business analysis, stakeholder reporting, and dashboard development. Awarded a Certificate of Excellence.

- **Google Data Analytics Professional Certificate | Google | Coursera | April 2025**
  Completed an eight-course professional training program covering data preparation, cleaning, analysis, spreadsheets, SQL, Tableau, R, data visualization, and a capstone case study. Gained practical experience in data processing, analyzing, and communicating data to support evidence-based decision-making.

- **Data Analytics Virtual Internship | JPMorgan Chase & Co. | Forage | Jan 2024**
  Acquired hands on experience in data analytics in financial services, developed skills in data interpretation, analytical problem solving, business intelligence, critical thinking, data driven decision making and communication of analytical knowledge to drive business decisions in banking.

ADDITIONAL CERTIFICATIONS

- Google Data Analytics Certification Course | Google | Coursera | April 2025
- Data Analytics and Visualization Job Simulation | Accenture | Forage | Jan 2024

- Data Analysis Hands-On Training Program | Victoria Solutions | Nov 2025
- Data Analysis with Microsoft Excel and Python | AQskill | Jul 2023
- Data Analytics and Visualization with Google Data Studio | AQskill | Mar 2023
- Data Analytics and Visualization with Power BI and Tableau | AQskill | Mar 2023
- Database Management with MySQL | AQskill | May 2023
